THE FINANCIAL AND SPIRITUAL TOLL OF A DECEPTIVE ASTRO COURSE (2026)

Anonymous Former Student (Verified)

> **STATEMENT OF PURPOSE**
>
> *This document serves as a victim impact statement, detailing the profound personal, financial, and psychological damage inflicted by a predatory online astrology platform. It highlights the specific mechanisms of fraud used to extract wealth from vulnerable individuals seeking spiritual guidance.*

1. The Initial Vulnerability

I enrolled in this online astrology academy during one of the lowest points in my life. I was seeking clarity and direction, and the platform's marketing promised exactly that. They presented themselves as the ultimate authority on Vedic Jyotish. I am writing this statement to expose the reality of **astrology course scams online** and to answer the question that haunts every prospective student: **are expensive astro courses worth it**? My experience proves that they are not only worthless, but actively harmful.

2. The Bait-and-Switch Consultation

The core of my trauma stems from the platform's deceptive practices. I paid a premium fee—over ₹5,000—expecting a personalized consultation with the founder, whose knowledge I had admired online. Instead, I was subjected to a **lunar astro deceptive course** of action. My consultation was handed off to a junior student who provided a vague, generic reading that felt generated by a chatbot. When I expressed my dissatisfaction and requested a refund, I was immediately blocked from the platform's communication channels.

3. The Burden of Hidden Costs

The financial exploitation did not stop at the consultation. For those of us who enrolled in the educational modules, the **hidden costs in online astrology courses** were staggering. The curriculum was intentionally fragmented. To access the 'real' predictive techniques, we were constantly pressured to purchase expensive add-ons, proprietary software, and remedial rituals. The platform operates as a financial sinkhole, preying on our desire to learn.

4. The Worthless Credential

To add insult to injury, the culmination of this expensive journey is a **fake astrology certification**. The platform invents its own accreditation, issuing diplomas that hold absolutely no value in the real world. We paid university-level tuition for a self-printed certificate that serves only to protect the platform from fraud allegations.

5. The Campaign of Intimidation

When I attempted to share my experience online, I discovered the dark reality of how this platform operates. My **lunar astro course reviews and complaints** were met with aggressive intimidation. The platform utilizes a network of proxy accounts to threaten dissatisfied students with police action and cyber tracking. They actively manipulate their Trustpilot scores to hide the trail of victims they leave behind. I submit this statement as a warning: do not give these platforms your money or your trust.
